Hey Dan – thanks for connecting me to John Wieber. I sort of forget about that resource. John is going to try and get me something for Tuesday but as we go forward and are expanding our view of the site, we should sit down with John together to get a consistent area that we are interested in.

John

We have many maps of the area already made that would be easy to modify. Any chance ESAT could get one made before COB Monday?

Dan – Do we have a good aerial photo map that shows not only Cement Creek but the upper reaches of the Upper Animas watershed above Silverton? I'd like to have something that we can show at the briefing with the RA next week if at all possible. I know this is rather late to be asking this so it may not be ready for Tuesday, but at some point I think we need to get such a map for future briefings or other meetings with State and BLM, etc. as well as the community. Don't know if you can task Techlaw for such a request.

Thanks.
